17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On May 9, 1975, this well was plugged back from 10,256' TD in the Devonian to base of the 8-5/8" casing at 2450'. On May 19 the Queen sand was perforated with 2 jet shots per ft. from 1754' - 1756' and 1760' - 1764'. The perforations were acidized with 1500 gal. of acid and swabbed dry. Pursuant to telephone conversation with Mr. Gressett this well was plugged and abandoned May 20, 1975, with a 35 sack plug from 1800 - 1700' across the Queen perforations and a 10 sack plug and marker at surface. The plug was spotted with heavy drilling mud and the work was done by Halliburton.

19. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
