Dear Mr. Gressett:

Reference captioned well and your recent letter. I have enclosed the revised C-103 showing the type casing as requested. Abbott Bros. advised that the 85 sxs of cement were run because the hole had no cavings and the indicated pay was at total depth. I do have a little problem getting up to date information from them. I called yesterday and asked that Abbott call me and bring all weels up to date.

Will advise when he calls.

Very truly yours,

WM/gw
