13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

McClellan Oil Corporation requests approval for shut-in status on the McClellan Federal No. 1 well as we have been unable to secure a connection or gas contract from GPM.

The following will be scheduled and performed in accordance with applicable rules and regulations:

- 1) Bradenhead test
-
- 2) Production verification test
-
- 3) Fluid level Sonic test between tubing and casing as per NMOCD Rule 203-C.

McClellan Oil requests permission to run a fluid level Sonic test in lieu of a casing integrity test as putting fluid on the formation would be detrimental to the producing zone.

These tests will be conducted within 90 days of approval and subsequent to notification being given to the BLM.

14. I hereby certify that the foregoing is true and correct

Signed

Mark McClellan
