To Whom It May Concern:

Re: Surface /Pool Commingling
Cottonwood Ranch Penn, Pecos Slope Abo
Chaves County, New Mexico

Dear Sir or Madam:,

Yates Petroleum Corporation respectfully requests administrative approval for Surface and Pool commingling for the following wells:

Cottonwood Ranch MK State #1
660' FNL & 1980' FWL (Unit C)
Section 36-T6S-R25E
Formation: Cottonwood Ranch Penn
Chaves County, New Mexico
State Lease # L-4283

Cottonwood Ranch MK State #5
2160' FNL & 330' FEL (Unit H)
Section 36-T6S-R25E
Formation: Pecos Slope Abo
Chaves County, New Mexico
State Lease # 4283

The production from these wells is measured at a common tank battery located at the Cottonwood Ranch MK State #1 tank Battery location.

The purpose of the surface and pool commingling is to reduce operating costs for storage and treating, thereby extending the economic life of each well. Without approval for utilizing the existing battery located at the, it will become necessary to build separate facilities. This will greatly increase costs and shorten the economic life of the well(s).

Because working interests for the wells are different, oil from each of the wells will be measured by turban metering equipment. Gas from the wells will be measured subtraction method from well tests. Allocation is done monthly based off of well tests. This allocation will ensure that all production from each of the wells is equitably accounted for with no significant effect on your revenue.

In accordance with the Oil Conservation Division's Rules 303-B, 309-B and 309-C, the following diagrams and maps are enclosed for you information.

If you should have any questions, please give me a call at (505) 748-4180 (direct line).

Thank you for your cooperation

Sincerely,

Mayte Reyes
