

8. ANCILLARY FACILITIES:

A. None required.

9. WELLSITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pits, and major rig components. The pad and pit area has been staked and flagged.
- B. There will be some minor cutting and filling of the wellsite because of the 1 - 2 foot sand dunes and also there is a 6" - 8" in 200 feet slope to the south.
- C. The reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the proposed well is non-productive, surface restoration will be in accordance with the agreement with the surface owner, Mr. Carlton Davis, owner of the Sand Ranch. Pits will be filled and location will be cleaned. The pit area, well pad, and all unneeded access road will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: The land surface in the vicinity of the wellsite is undulating to gently rolling and dunny. From an elevation of 3973.6 feet at the well site the surface slopes gently to the south 6"-8" in 200'.
- B. Soil: Soil is a deep fine sand slightly compacted. There is more stability than the dunes to the north toward the Bikar Federal No. 1.
- C. Flora and Fauna: The vegetative cover consists of very sparse miscellaneous grasses, sunflowers, shinnery oad, bear grass yucca, sage brush and other miscellaneous desert flowers and weeds. The only wildlife observed were lizards, jackrabbits, snakes and quail, but it is likely that other typical semi-arid desert wildlife inhabit the area, which is used for cattle grazing.
- D. Ponds and Streams: There are no rivers, streams, lakes or natural ponds in the area, however, there are several ranch tanks within a half mile of the wellsite to the south as shown on Exhibit "B".
