INSTRUCTIONS

and form is to be filed with the appropriate district. If one of the original wells is drilled, and after the completion of any newly-drilled or deepened well, it shall be re-sampled for any of the following parameters: water quality, water level, and any one of all special tests conducted, including pH, nitrate, and lead. All re-samples shall be taken as depth, date, and location of the newly drilled well, the vertical depth shall also be reported. For multiple water quality parameters, a minimum of one test is required for each parameter. Test results to be filed in triplicate except on water level, where only one sample is required. (Section 12.3)
