ARTESIA, OFFICE

Dear Mr. Gressett:

Enclosed please find in duplicate the Form C-116 (Gas - Oil Ratio Test) for the subject well. When this test was done the casing valve was closed. The pumper has since opened the valve and the well is producing approximately 22 barrels of oil per day. It would follow from the GOR that the well is also producing 6.9 MCF of gas daily.

Sincerely,

Pamela Bacon
Production Secretary
