

- 2) The location pad will be located in a small saddle facing north and south. The soils encountered are predominately tan sands which include caliche fragments and gravels, as well as quartzite, chert and basalt. The ground surface is 50% devoid of vegetation. Principal plants in the vicinity of the proposed construction include mesquite, plains yucca, purple prickly pear, blue grama, western wheatgrass, broom snakeweed and juniper.
  - 3) The surface is privately owned by Mr. Pat Boone, Jr. and is used for grazing. There are no occupied dwellings or water within a one mile radius of the well.
  - 4) Excerpt from operating agreement between Sunmark and Enserch Exploration, Inc. attached as Exhibit No. 9.
12. The well will be supervised by personnel under the direct supervision of Mr. C. H. Peeples, Manager, Western Region Drilling Department, Enserch Exploration, Inc., Empire Central Building, Suite 800, 7701 N. Stemmons Freeway, Dallas, Texas 75247. Office phone: 214/630-8711.
13. Certification:
- I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Enserch Exploration, Inc. and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.
