If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The rotary rig, which was scheduled to drill this well, has been delayed with a fishing job on another well; and as we plan to be drilling over May 31, 1980, the lease expiration date, it may be necessary that we drill with a cable tool rig until the rotary rig becomes available.

Anticipated spud date is May 28, 1980.
