

MULTIPLE COMPLETION
(CONVENTIONAL)

F.1

Brynberg Com Federal #1
6s R24e Sec. 13
1980 FEL 1980 FSL
Chaves County, New Mexico

- 1) Said well is to be completed as a gas-gas and the hydrocarbons from each of the zones can be safely and efficiently produced through one string of tubing and one string of casing.
- 2) The packer used to segregate the separate zones of multiple completion will be a Baker Lockset Packer and shall effectively prevent communication between the two producing zones.
- 3) The two producing zones are the ABO and Penn respectively.
- 4) Form 2-107 attached hereto.
- 5) For administrative approval;
