Propose to alter casing program as follows:

Drill 10" hole to 150 - 200 feet and mud in 8 5/8 " 20 # casing to test small water flow from about 80 to 100 feet and seal off same. If additional water is encountered from base of 8 5/8 " casing to Top of San Andres at about 720' the hole can either be cased with 7" casing or the hole reamed and 8 5/8 " casing run to shut off water. Either proposal will be discussed with your office before final casing setting and cementing.
