SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	SACKS OF CEMENT	EST. TOP
17 1/2"	13 3/8"	48# J-55	Approx. 450	300 sx.	circulate
7 7/8"	5 1/2" or 4 1/2"	15.5# or 10.5	TD	450 sx.	circulate

We propose to drill and test the AEO and intermediate formations. Approximately 450' of surface casing will be set and cement circulated to shut off gravel and caving. If needed (lost circulation), 8 5/8" intermediate casing will run to 1500' and cement circulated. If commercial, production casing will be run and cemented with adequate cover, perforate and stimulate as needed for production.

JD PROGRAM: FW gel and LCM to 1500', brine KCL to 3200', KCL drispak & starch to TD.
MW 10-10.2, Vis 34-39, WL 14-7.

P PROGRAM: BOP's will be installed on 13 3/8" casing and tested daily.
