

COMER No. 1
 Sec 18, T5S, R25E
 Chaves Co., New Mexico
 5-5-81

$$n = 1/\text{Slope} = \frac{\text{Log } Q2 - \text{Log } Q1}{\text{Cycle}} = \frac{\text{Log } 3150 - \text{Log } 600}{\text{Cycle}} = \frac{3.49 - 2.79}{.7} = .7$$

$\theta = 55^\circ$
