

Yates Petroleum Corporation
Comanche "PQ" Federal #1
Section 27 - T10S - R25E
990' FNL and 990' FEL
(Developmental Well)

This plan is submitted with Form 9-331C, Application for Permit to Drill, covering the above described well. The purpose of this plan is to describe the location, the construction activities and operations plan, the surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operations, so that a complete appraisal can be made of the environmental effect associated with the drilling of this well.

1. EXISTING ROADS.

Exhibit A is a portion of a county map showing the roads in the vicinity of the proposed location. The proposed wellsite is located approximately 7 miles East of Roswell, New Mexico and the access route to the location is indicated in red and green on Exhibit A.

DIRECTIONS:

1. Proceed east from Roswell on Highway 380 for a distance of approximately $7\frac{1}{2}$ miles.
2. Turn North for approximately $1\frac{1}{2}$ miles, then turn east for $\frac{1}{4}$ mile. The federal surface starts here where we turn north for $\frac{1}{3}$ mile to the location. This road continues north to an abandoned location.

2. PLANNED ACCESS ROAD.

- A. Parts of the existing road are so bad we will have to water and blade it.
- B. The road will be 12 feet in width (driving surface).
- C. The road will be bladed. The surface will be crowned, with drainage on one side. One turnout will be built.
- D. The road has been flagged and the route of the road is visible.

3. LOCATION OF EXISTING WELL.

- A. There are wells to the south and west.

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES.

- A. There are no production facilities on this lease at the present time.
- B. In the event that the well is productive, the necessary production facilities will be installed on the drilling pad. If the well is productive oil, a gas or diesel self-contained unit will be used to provide the necessary power. No power will be required if the well is productive of gas.
