

STATEMENT BY APPLICANT UNDER OATH:

A. The surface drilling of the well for which I seek a determination was begun on or after February 19, 1977. The well satisfies any applicable federal or state well-spacing requirements, and the well is not within a proration unit: (a) which was in existence at the time surface drilling of the well began, (b) which was applicable to the reservoir from which such natural gas is produced, and (c) which applied to any other well which either produced natural gas in commercial quantities or the surface drilling of which was begun before February 19, 1977, and was thereafter capable of producing natural gas in commercial quantities. I conclude, that to the best of my information, knowledge and belief, the natural gas for which I seek a determination is produced from a new, onshore production well based on the information included in this application. I have no knowledge of any other information not described in this application which is inconsistent with my conclusions.

I declare that I am authorized to make this application, that it was prepared by me or under my supervision and direction, that any documents or summations thereof from my files permitted in lieu of copies from Commission files are true and correct copies of summations of the documents originally required to be filed with the Commission, that I have served a copy of the C-132 and FERC Form 121 on the parties required by Commission rules and listed on this form, and that these statements are true, correct and complete to the best of my information, knowledge and belief.
