Re: Application for Surface Commingling
NM Fed Com 5 #1

Dear Mr. Coats,

Summit Resources received the attached violation (43 1FR 3162.7-3) on the subject well. This property was purchased in an auction 12/1/93 and has been commingled with two other wells also purchased in the auction. Summit Resources was not aware that this was in violation of any BLM regulations.

Below are the three wells that are commingled at the surface with sales into a common sales meter:

Lease No.	Well	CA #	Legal Location
MM-22846	NM Fed Com 5 #1	RNM 136	460 FSL 460 FWL, Sec 5, T5S, R13E
MM-22846	US Federal 5 #1	NA	460 FSL 1960 FEL, Sec 5, T5S, R13E
State Lease	McElvain St Com 6 #1	SCR 389	990 FSL 490 FEL, Sec 6, T5S, R13E✓

All are
also wells

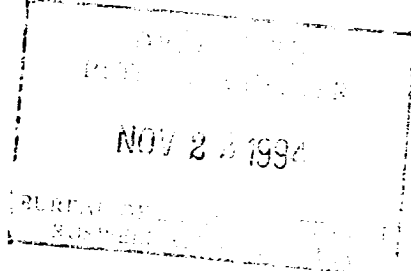

Each well has an individual check meter in its location prior to commingling into a gathering system and ultimately to the sales meter located on the location of the McElvain St Com 6 #1 well. The Transwestern Pipeline Company meter station #18950 is located 130' north of the McElvain well. Once the sales volume has been obtained from the common point meter, individual well sales volumes are allocated back to the three wells based on chart integrations.

It is requested that the BLM approve the surface commingling of the above mentioned wells to the common point sales meter. If you require any additional information, please give me a call at 405/341-7481.

Sincerely,

Kim D. Biggs
