Re: Campbell Station Unit
#3-H-33-8-27
Wildcat Fusselman

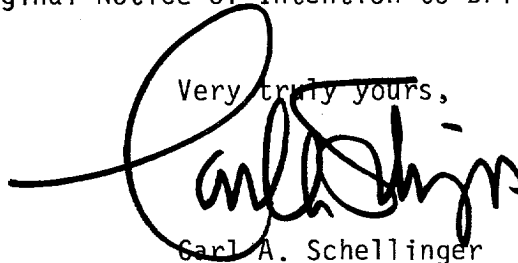

Dear Mr. Clements:

In line with our conversation we are enclosing a C-103 denoting a change of plans concerning the casing progress for the Campbell Station Unit No. 3 Well.

Plans were modified in view of the customs and practice throughout the general area. We have enclosed an example, being the Elk Oil Company No. 1 Graham State and have also attached the Drilling Report for our No. 2 Unit Well which was drilled with cable tools. You will note on the cable tool hole we encountered some water from 190 to 215; however, the hole was bailed dry.

We trust the enclosures are satisfactory and apologize for our error in the original Notice of Intention to Drill. Thank you.

Very truly yours,

Carl A. Schellinger
