Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We propose to set a 5½" CIBP at 2850' with a 35' cement cap. We would find the Free Point on the casing cut and pull out of the hole. We would load the hole with mud and run cement 50' below and 50' above the 5½" stub. Tag the top of the cement, set 10' cement surface plug and dry hole marker.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
