7. Descriptive Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well has been drilled to a total depth of 3400' and logged. Log evaluation indicates that the original objective formation (Abo) will not be commercially productive. Rather than plug the well at this point, we now propose to continue drilling under the original drilling permit to a new total depth of 4200', log and evaluate the Granite Wash interval. If production is obtained an appropriate dedication plat will be submitted. Projected formation tops are Abo @ 2822', Penn @ 3725', Pre-Cambrian @ 4025'.

8. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
