Re: L.E.M. 2
#1-G-2-10-28
Wildcat San Andres Pool

Gentlemen:

This office has received the C-103 showing that the above captioned well has been plugged.

Before an approval can be given you will need to file the C-103 showing when well was spudded, when 8 5/8" casing was run, 18 hour shut down waiting on cement and pressure testing of casing before resume drilling.

You must file a C-105, completion report, the same as you would have done for a producing well, the original and 3 copies of the Deviation Survey and a copy of all logs that have been run on the well.

When the location has been cleaned and restored and is ready for inspection, you should file another C-103 as to this effect.

When this has been done and the location has been approved by our inspector, the well can be approved as plug and abandon.

If we can be of any assistance, please let us know.

Sincerely,

A handwritten signature in cursive script that reads "Leslie A. Clements".
Leslie A. Clements
