(This space for Federal or State office use)

APPROVED BY: [Signature] TITLE: [Signature]

CONDITIONS OF APPROVAL, IF ANY:

Produced water from well will be stored in a 56 barrel fiberglass tank which will be located on the well pad. The fiberglass tanks will be open-ended to allow evaporation of the produced water. When the produced water tanks become full, the produced water will be transported from location and hauled to White Lakes Ranch surface disposal, which is approved by the N.M. Oil Conservation Division.

A copy of a water analysis from the China Draw Federal Comm. #4 well is included. The China Draw Federal Comm. #4 well is located approximately 1 1/2 miles South of this well and also produces from the Abo formation.
