17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Fully state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.*

Produced water from well will be stored in a 56 barrel fiberglass tank which will be located on the well pad. The fiberglass tank will be open-ended to allow evaporation of the produced water. When the produced water tank becomes full, the produced water will be transported from location and hauled to White Lakes Ranch surface disposal, which is approved by N.M. Oil Conservation Division.

A copy of a water analysis from the L.L. & E Federal No. 1 is included. The L.L. & E Federal No. 1 well is located approximately 1.3 miles Northwest of this well and also produces from the Abo formation.

18. I hereby certify that the foregoing is true and correct
