

SUPPLEMENTAL DRILLING DATA

BRAN OIL CORPORATION
Union '33' Federal No. 1
1980' FSL & 1980' FEL
Sec. 33, T6S, R26E
Chaves County, N.M.

LC-068127

The following information is filed in accordance with 'Onshore Oil and Gas Order' No. 1:

1. Geologic Name of Surface Formation: Alluvium

2. Estimated Geological Marker Tops:

Glorietta	1656'
Tubb	3070'
Abo	3797'

3. Estimated Depths to Oil, Gas and Water:

Water	Above 600'
Gas	Below 4000'

4. Proposed Casing and Cement Program:

Surface Casing - Set approximately 800', 8 5/8", 24.0#, J-55 ST&C casing. Cement to surface with 600 sx Class 'C' cement.

Production Casing - Set to total depth, 4 1/2", 10.5#, K-55, ST&C casing. Cement to isolate all oil, gas and water zones, or TOC to 600' above top of pay.

5. Proposed Mud Program:

0 - 800'	Lime and gel, spud mud, viscosity 32-34
800 -3697'	Fresh water
3697 -T.D.	Mud up at 3697' with salt base mud; viscosity 36-38; water loss 10-15cc
