DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This will be a cable tool Pennsylvanian Test to be known as Black Hills Unit #1. Anticipated formations are San Andres 0-950', Glorieta 950-980', Yess 980-3070', Abo 3070-4420', Permian-Penn. 4420-5000'. We plan to set approximately 500' of 10-3/8" casing to be mudded; 1500' of 8-5/8" casing to be mudded and, if required, 3000' or more of 7" casing. If 7" required, either cement 7" or go back and cement 8-5/8" casing. Run 5-1/2" Oil String if required.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
