Mr. Carl B. Livingston, Atty.,
Oil Conservation Commission,
Santa Fe, New Mexico.

Dear Carl:

Re: Drlg Bond for one well NW $\frac{1}{4}$ NW $\frac{1}{4}$
19-15S27E, J.L. Mathieson, Principapal

The above well has been plugged and abandoned
according to the rules and regulations, and there is
nothing in the way of the bond being released.

In the future if these people would file their
Form S-103 get it approved and send copy to bonding company
they would not have any trouble.

Very truly yours,

Hobbs, New Mexico

Re: Drilling bond (\$5000.00) for one
well upon NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 19-15S-27E.
J. L. Mathieson, Principal, with
Maryland Casualty Company, Surety.

My dear Guy:

Please report as to the status of the above designated well. The principal, Mr. Mathieson, was in yesterday. He states that he has completed the well, cleaned up the premises and the like, and that his bond should be ready for release upon an O. K. from you.

Our concern relative to releasing the bond at this time, provided it is ready to be released, is that Mr. Mathieson is applying for a similar bond upon another well up in this part of the country. I believe it will greatly facilitate his getting the bond if the present one is released, for that would show that he has made good on the one, and would encourage the surety company to extend him another.

Very truly yours,
