Sept. 3., 19 52

Well No. 4 is located 1650 ft. from N line and 1650 ft. from W line of sec. 33
N 1/2 NW (1/4 Sec. and Sec. No.) 175 (Twp.) 33E (Range) RPN (Meridian)
Valencia (Field) Lee (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We wish to top this well with rotary tools, setting 8 5/8" casing at approx. 1375 feet and cementing with 50 sacks. 7" oil string will be run to an approximate depth of 4200 ft. and cemented with 100 sacks. The well will be drilled to the San Andres, which is expected at about 4350 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
