DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Confirming oral request of well abandonment. This well was drilled to a Total Depth of 10,158 feet in dolomite, where water was encountered in the Devonian.

The well was plugged as follows with heavy mud in the hole:

10,043 - 10,100' - 20 sacks Cement
7,843 - 7900' - 20 sacks Cement
2,983 - 3040' - 20 sacks Cement
2,053 - 2110' - 20 sacks Cement

Authority is requested to leave well in above condition, not completely abandoned in order that 9-5/8" casing can be salvaged at a later date and the required surface marker put in place.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
