13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work)*

The Brunner Federal #1 last produced gas in December 1997. The gas company disconnected meter, because of low gas volume. The well was not able to buck line pressure.

Presently the well is Shut-In waiting for higher gas prices to justify a compressor.

If gas prices recover to justify a compressor, will place back on production.
