The elevation of the derrick floor above sea level is 3596 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicete mudding jobs, cement-ing points, and all other important proposed work)

Propose to drill to a total depth of 2900'. 8-5/8" OD surface casing will be set and commented to approximate depth of 150" with sufficient coment to circulate to ground surface. OD casing will be set at the approximate depth of 2900' and 5-1/2 cemented with sufficient coment to protect all potential zones.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
