If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Request approval for gas venting.

Reasons for venting of gas: The amount of gas flowing to a central battery is used for pump jack engines, dump values, heater treater and now for an engine, on disposal well (Shell Fed. 15 #3). A gas pipeline to said well would prove to be uneconomical. Total gas produced from Shell 15 Fed. 1 & 2 is 57 MCF/day. Most of this gas is used on equipment. Gas venting at present is T.S.T.M.
