Re: State Well No.1-A,
2-15-29, Double L-Queen
Pool, Chaves County,
New Mexico

Gentlemen:

An inspection of the subject well January 11, 1971, revealed that gas was apparently being used to gas lift water from a water well located about 4 to 5 feet west of said well.

As this office has received no request to produce gas from the well, and as the use of gas for the purpose noted above, without further beneficial use, is prohibited by Rule 404 (a), Commission Rules and Regulations, you are hereby directed to immediately shut the well in. A copy of Rule 404 (a) is enclosed for your convenience.

Further, the following Commission reports are now delinquent and must be filed at the earliest.

1. Form C-103, 3 copies, showing all required data as to the setting and cementing of production casing and the perforation and treatment of the well.
2. Form C-105, 6 copies, Well Log, to be completed as indicated on the form and to be accompanied by one copy of all mechanical logs run and all cores and/or d.s.t. reports.

Finally, no well sign was found at the location as required, see Rule 103 also enclosed.

-2-

Luttrell Oil Company

Failure to comply with the shut-in notice above or to file necessary forms may result in severe penalties.

Very truly yours,

OIL CONSERVATION COMMISSION

R. L. Stamets
