(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is currently making approximately $\frac{1}{4}$ bbl. water per day. We believe that the water is load water from the frac job. The water is being produced into the production tank and will be hauled off by Jim's Water Service* in Artesia before the oil is sold. The water will be taken to the nearest commercial SWD and disposed of properly.
