Re: Re-designation of Field,
#1 Jones-Federal
L-22-15S-29E

Dear Sir:

This well is currently producing in the Chaves Queen Gas-SE Field. In 1978 it produced 22,689 MCF plus 933 BO. A GOR test on 9-10-78 was 48,960-1. In January 1979, it produced 246 MCF + 93 BO. On 3-15-79 the GOR was 32,351-1 and the well made 3 BOPD.

When a GOR was taken on 6-25-79, it produced 6½ BO plus 2 BWPD. We therefore respectfully request that this well be re-designated as an oil well in the Lucky Lake Queen-South oil field.

Enclosed are 5 C-104's. If more information is necessary, please contact us.

Yours truly,

Leon M. Lampert
