13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Since purchasing these wells in July 2000, we have been fighting high line pressure with Conoco. We have tried several options, but the only feasible option will be for Conoco to lower their line pressure, which has been running between 55 and 85 lbs. This is supposed to be a low pressure sales line and we have met with Conoco numerous times over the last year and a half with lots of promises, but few results. After receiving your letter, we recently had another meeting with them advising them that we either had to start producing these wells or they would have to be plugged. They advised they would re-evaluate the situation and let us know. We received a call from Kevin Shuster with Conoco (505) 676-3505. He advised they knew there were some problems with this line and they would be taking appropriate measures to lower the pressure on the line. He advised this work would be done in the next four to six weeks.

If we can get the line pressure down even close to what it is supposed to be, this well would be profitable to produce. If not, we will have no option but to plug it.
