No well will be assigned an allowable greater than the amount of oil produced on the official test. During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which wall is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.	able great	er than he produraged	the amou	unt of oil a rate n advantag	produce of excee	d on the official ding the top un 25 percent tole	test. it allowable rance in ord	for the pool er that well	in which wal	ned:	I he	I hereby certifis true and complete ledge and belief.	rtify that mplete t	the above	I hereby certify that the above information is true and complete to the best of my knowledge and belief.
Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. will be 0.60. Report casing pressure in lieu of tubing pressure for any well producing through casing.	MCF meas	ured at	a press	ure base	of 15.02 ing throu	5 psia and a teach	mperature of	60° F.
