17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was re-entered and perforated at 804-820' KB = 793-809' GR. We were unable to pump any water from the well. The perforations were acidized with 2000 gallons of 15% HCL and displaced with fresh water, but the well still did not give up any fluid. The landowner, Mr. J. T. Jennings, has asked for transfer of title to the well and an affidavit of responsibility has been filed with your office to this effect. Mr. Jennings may want to re-perforate this well deeper for a windmill operation.
