17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

8-5-77 Drilling below 1000' has begun to pickup salt water and is causing difficulties with cable tool drilling. Hole caves-in and results in net loss of footage drilled. As per telephone conversation with Mr. Knoff this date, we are moving off the Adkins Drilling Co. rig and will move on a reverse unit to complete the hole. DA & S unit is scheduled to move-on location 8-8-77 and rigup for commencing reverse drilling AM 8-9-77. Steel mud pits will be used (no additional dirt work), an adequate (1500 psi) BOP will be installed during drilling. Hole size is reduced to 6-1/4" at this time. We also wish to change expected casing size to 5-1/2" X-line.
