Pool- 57830

IT IS THEREFORE ORDERED: **X** 487 8-20-80

That the applicant, McClellan Oil Corporation be and the same is hereby authorized to inject water into the Queen formation through plastic-lined tubing set in a packer at approximately 1920 feet in the following described well for purposes of secondary recovery, to wit:

Sulimar Queen Unit Tract 1, Well No. 13 in Unit M of Section 24, Township 15 South, Range 29 East, NMPM, Chaves County, New Mexico.

IT IS FURTHER ORDERED:

That the operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

That the casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing, or packer.

That the injection well or system shall be equipped with a pop-off valve or device which will limit the surface wellhead pressure to a maximum of 400 pounds per square inch; provided however that the Division Director may administratively authorize a pressure limitation in excess of the above upon the operator's establishing that such higher pressure will not result in fracturing of the confining strata.
