

8. ANCILLARY FACILITIES:

A. None required.

9. WELLSITE LAYOUT:

A. Exhibit "C" shows the relative location and deminsions of the well pad, mud pits, reserve pit and trash pit. The rig will be erected with the V-door to the west.

B. There is a maximum of a 3 foot grade on the existing location area and only minor levelling of the wellsite will be necessary.

C. The reserve pit will be plastic lined.

D. The pad and pit area have not been staked and flagged.

10. PLANS FOR RESTORATION OF THE SURFACE:

A. After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and location will be cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.

B. Any unguarded pits containing fluids will be fenced until they are filled.

C. After abandonment of the well, surface restoration will be in accordance with the agreement with the surface owner as follows: Pits will be filled and location will be cleaned. The pit area, well pad and all un-needed access road will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

11. OTHER INFORMATION:

A. Topography: The land surface consists of a plain with a prominent eminence on which the wellsite is located. From an elevation of 3565.2' at the well-site, the land surface slopes gently to the northeast at about 50' per mile.

B. Soil: Local soils are thin and sandy and overlie a weathered limestone formation.

C. Flora and Fauna: The vegetative cover is generally sparse and consists of clump mesquite, greasewood, buffalo grass and snake weed. Wildlife in the area is typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.

D. Ponds and Streams: There are no lakes or ponds in the area. The Pecos River is located approximately 6 miles west of the proposed location.

E. Residences and Other Structures: The nearest dwelling is an unused ranch house 3 miles northwest of the proposed location. The nearest water well is a windmill 1/2 mile east of the proposed location.
