17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Operator obtained a 3-week extension from Jack McClellan for re-spudding this well so that it could be drilled with a cable tool rig owned by Hammond Bros. Drilling Co. of Artesia, N. M. Inasmuch as that rig is still not available for timely re-spudding the well, Operator has decided to deepen the well with a rotary rig owned by Stewart Bros. Drilling Co. of Grants, N. M.

Anticipated re-spud date is 5-28-81. Drilling fluid will be fresh water with gel or lime added as needed for viscosity control. Blowout preventer equipment will be a 10" K-900 flanged annular BOP.

This is a follow-up of telephone conversation between Roger Chapman and Jim Knauf on 5-26-81.
