

F. Culverts: None necessary

G. Cuts and Fills: The pad will require about 4' of cut on the south side and 2' of fill on the north side.

H. Gates, Cattleguards: None necessary

3. LOCATION OF EXISTING WELLS:

A. See attached EXHIBIT A.

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

A. Production facilities will be installed on the well pad.

5. LOCATION AND TYPE OF WATER SUPPLY:

A. The well will be drilled with mud. Water for drilling operations will be purchased from a commercial water source at Loco Hills and trucked over existing roads.

6. SOURCE OF CONSTRUCTION MATERIALS:

A. It is planned to use in situ material for construction. If additional caliche is needed, it will be removed from a Federal pit located in the SE/4 Sec.20, T.14S., R.9E.

7. METHODS OF HANDLING WASTE DISPOSAL:

A. Drill cuttings will be disposed of in the drilling pits.

B. Drilling fluids will be allowed to evaporate in the drilling pits until the pits are dry.

C. Water produced during test will be disposed of in the drilling pits.

D. Current laws and regulations pertaining to the disposal of human waste will be complied with.

E. Trash, waste paper, garbage, and junk will be buried in a separate trash pit and covered with a minimum of 24 inches of soil. All waste material will be contained to prevent scattering by the wind. The trash pit will be located adjacent to the mud pit.

F. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.
