

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

BRIDGE OIL PRODUCTION COMPANY, INC.
No.1 Yates Federal
NWNW Sec.27-14S-29E
Chaves County, N.M.
Federal Lease NM-70326

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

- A. Exhibit "A" is a map showing the location of the proposed well as staked. The well is approximately 18 air miles east of Hagerman, New Mexico.
- B. Directions: Go east from Hagerman, N.M. on NM 31 for 20 miles. Exit NM 31 to the north through a cattleguard on Jemina County Road. Go north 0.4 mile, then northwest 1.1 mile, then north 0.25 mile. Turn northwest on Katrina Road and go 0.2 mile. The well location is 700' north.

2. PLANNED ACCESS ROAD:

- A. Length and Width: The new road will be about 600' long and about 14' wide, with 3' shoulders on each side.
- B. Surfacing Material: The new road and pad will be constructed of in situ material. If necessary, the road and pad will be surfaced with about 6" of caliche.
- C. Maximum Grade: Less than 3%
- D. Turnouts: Since the road is only 600' long, no traffic turnouts are necessary.
- E. Drainage Design: The road will be constructed with about 4" of crown and necessary water turnouts to provide drainage.
