RE: Harris Federal #11  
Section 26 T15S-R27E  
Chaves County, New Mexico  
De Novo Case #11514  
Order #R10622

Ladies & Gentlemen:

Enclosed please find Form C-122-C for the subject well. Per the subject order number, Read & Stevens, Inc. is required to conduct a deliverability test into the pipeline on the subject well. The deliverability test was performed October 20, 1998 and the Artesia OCD office was advised of the date and time of the test.

Please note on the Form C-122-C that the stabilized test rate into the pipeline was 1,215 MCF, and the calculated deliverability at pipeline pressure using the "n" from the Multipoint Back Pressure Test was 1,732 MCFD. Taking the deliverability of 1,732 MCFD times fifty percent (50%) would yield an allowable of 866 MCFD for the subject well.

If you have any questions, please advise.

Sincerely,

READ & STEVENS, INC.

John C. Maxey, Jr.  
Petroleum Engineer
