

12. Other information

1. Topography: The project is situated on a slightly rolling plain of loamy soils with considerable amounts of caliche gravels containing large amounts of chert nodules.
2. Soil: Deep, level to rolling, moderately permeable to rapidly permeable fine sandy loams and loamy fine sands.
3. Flora and Fauna: Vegetation cover is approximately 50% and consists primarily of mesquite, littleleaf horsebrush, broom snakeweed, broom snakeweed, prickly pear cactus, assorted grasses and other flora.
4. Ponds and streams: There are no rivers, streams, lakes or ponds in the area.
5. Residences and Other Structures: None
6. Archaeological, Historical and Cultural Sites: Cultural resources have been recorded in the area. Geo-Marine Inc. has completed an archaeological report of the work area, see attached exhibit "A".
7. Land Use: Grazing
8. The well site, if a producer, will be maintained and kept clean of all trash and litter, which detracts from the surrounding environment. Equipment will be maintained in accordance with good operating practice.
9. After the wellsite is cleaned and pits and sumps backfilled, any obstruction to the natural drainage will be corrected by ditching or terracing. All disturbed areas, including any access road no longer needed, will be ripped. Those areas will be reseeded with native grasses as described by BLM.
