DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to clean out to original total depth of 2585 with cable tools and deepen with cable tools to approximately 2670 feet. Top of lower pay is expected at about 2635 feet and if present will be fraced and placed on production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
