(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3576** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well will be drilled approximately 550' to the Yates sand. 500' of seven inch 20 pound pipe will be set and mud to shut of the existing water sands. 5" pipe will be set above the pay for the production string. This is new 5" weighting 15 pounds and is in 30' lengths. This string will be cemented with 25 sacks of river side cement. The 7" will then be pulled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
