U.S.P. Meridian

(County or Subdivision)

New ~~black~~ territory

The elevation of the derrick floor above sea level is 3515 ft.

APR 14 1959

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill to an expected depth of approximate 750 feet or production in the Seven Rivers, expected around 450 feet. We propose to set an approximate 300 feet 8 5/8" pipe, shut off surface water. If we make a well cement 7" on or through the pay section.

Approval is subject to State Engineer's regulations required on "application for permit to drill for oil" in Water Basin.

Box 810

Roswell, New Mexico

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

STANDARDIZATION AND REPORTING OF DATA

The purpose of this report is to provide a summary of the data collected during the study. The data was collected from a series of experiments conducted over a period of six months. The results of the experiments are presented in the following tables. The data shows that there is a significant correlation between the variables studied. The results of the experiments are presented in the following tables.

TABLE I. Summary of Data Collected During the Study.

The data was collected from a series of experiments conducted over a period of six months. The results of the experiments are presented in the following tables. The data shows that there is a significant correlation between the variables studied.

The results of the experiments are presented in the following tables. The data shows that there is a significant correlation between the variables studied.
