June 26 19 61

Well No. 1 is located 660 ft. from N line and 1980 ft. from W line of sec. 20

NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec 20 17 South, 27 East NMPM
(S. Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Undesignated Eddy County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~drill hole~~ above sea level is 3372 ft. (911)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate casing joints, cementing points, and all other important proposed work)

It is proposed to drill to an approximate total depth of 1300 feet to the top of the San Andres with rotary tools. Hole size $6\frac{1}{2}$ inch. Most of the overlying zones are believed to be water productive and normal practice in this area for deep wells calls for surface casing near 1200 feet. It is proposed to set $4\frac{1}{2}$ inch O.D. 9.5 lb. casing at T. D. and cement with sufficient cement to circulate to surface. (This program has been discussed and approved by Mr. Wright of the N.M. Board of Engr., Surface Water Control.)
