DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to re-enter the Monterey Oil Company #22-29 Federal and clean out the old hole to 600', set a bridge, perforate 2 jets per foot at 531-542 & 556-559. The well will then be washed with H₂A, frocked, and completed as either a producer or plugged and abandoned.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
