13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The two wells in question: Duffield #1 & Duffield #2 are each separately metered at the well before being commingled through the GPM meter. The lease operator reports the volume of each separate well to our office daily - at the end of each month we add up the total production of each well and then are able to determine the percentage each well produced. We do this because the report we receive from GPM just gives total volume of Raw Gas from the lease.

**\*\*Note:** These 2 wellas produce from the same formation (Strawn)
